## SUMMARY OF SKILLS

- 8 years of industry experience building software products and applications
- Programming Languages: **Java, Javascript, Typescript**
- Tools: **Git, MySQL, Loopback, MongoDB, Java Springboot, Android Studio, Postman, Splunk**
- Experienced with **ReactJS, ReactNative, Redux, NodeJS, Bootstrap, HTML, CSS, CSS Tailwind, RESTful APIs, CI/CD Jenkins, Agile ticketing system**

## PROFESSIONAL EXPERIENCE

**Frontend Developer** – SAICON CONSULTANTS INC.

Feb, 2020 – Jan, 2025

- Provided remote consulting services to **Walmart Global Tech**.
- **Developed, optimized, and maintained** high-performance, internal-facing applications using **JavaScript, TypeScript, ReactJS, React Native, and Redux**, delivering seamless experiences to thousands of daily active Backroom Associates across **global, enterprise-level markets**.
- **Built scalable, reusable, and maintainable codebases** to manage critical application functionalities, including **configuration, deployment, performance monitoring, scalability, security, and alerting** across **CI/CD pipelines** for **testing, integration, and production environments**.
- **Planned and implemented application enhancements**, improving **performance, resilience and user experience**.
- Conducted peer code reviews to ensure **clean architectural** and **continuous enhancements**.

**Remote Software Engineer** – HIVE LOGICIEL LLC

Feb, 2018 – Dec, 2019

- United with the company official on a variety of IT projects
- Fulfilled comprehensive analysis of software requirements
- Excelled in providing throughputs in iterations of application development
- Facilitated efforts in association with team workflows
- Projects:
  - FoodieApp: Delivered engineering and architecture aspects of modern **Springboot** application
  - GSTV: Responsible for improvements for dashboard UI/UX using **Javascript, ReactJS-Redux**
  - AgendaOrganizer: Tasked with providing a **RESTful APIs** using **MeteorJS** and improved code quality in **Javascript, ReactJS**

## EDUCATION

**University of Washington** – Tacoma, WA

Sep, 2015 – Dec, 2017

Bachelor of Science in Computer Science, GPA: 3.80

## PERSONAL PROJECTS

*Fullstack WebApp with JS -React-Redux-MongoDB*

- **ShopEase** – This is an e-Commerce web app built with **ReactJS-Redux** for a dynamic and interactive UI, **Javascript** for seamless functionality and **CSS Tailwind** to design a clean, responsive layout.
- **ShopEaseMobileApp** – This is an e-Commerce mobile app built with **ReactNative, TypeScript** and **Redux**, offers intuitive interface, real-time updates and efficient state management.
- **GradTrack** – Using high level of **ReactJS** with **Javascript** to manipulate UI with dynamic data using **MongoDB** for organizing the employment information of graduate students.

*Fullstack WebApp with Java*

- **GradTrack** – Created UI using **Java Swing** and created a small database using **MySQL** for organizing the employment information of graduate students

*Android App*

- **OutOfGas** – Mobile application enables drivers to search nearby gas stations using **GPS** by using **Google Maps API** with detailed map view, and made calls to a web service to connect to a database.
